Bluetooth® Wireless Speaker System

Before operating the system, please read this guide thoroughly and store it for future reference.

WARNING

To reduce the risk of fire or electric shock, do not expose the cabinet to rain or moisture. Do not place objects filled with liquids, such as vases, on the cabinet.

To reduce the risk of fire or electric shock, do not expose this apparatus to dripping or splashing, and do not place objects filled with liquids, such as vases, on the apparatus.

Do not install the apparatus in a confined space, such as a bookcase or built-in cabinet.

As the main plug of the AC adaptor is used to disconnect the AC adaptor from the AC outlet, connect the unit to the AC outlet so that the plug can be easily and quickly pulled out in an emergency.

The system is not disconnected from the AC mains as long as it is connected to the AC outlet even if the system is turned off.

On Copyrights and Licences

Sony has licensed the Bluetooth® word mark and logos to be used on products that have completed themulation process. The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Sony Corporation is under license. Other trademarks and trade names are those of their respective owners.

CAUTION

This system is a Class B device. In a residential area, it may cause radio interference, in which case, the user may be required to take adequate measures.

Precautions

Notes when using with a mobile phone

- For the best performance, turn off the mobile phone's wireless function when receiving a call while connected to a wired phone using the Bluetooth connection, or when using the mobile phone with a Bluetooth device connected to the phone.
- To avoid interference with wireless LAN and interconnection problems, use the Bluetooth function with the mobile phone and other Bluetooth devices only when not in use of the phone.

Notes on the AC adaptor

- When connecting or disconnecting the AC adaptor, turn off the power to avoid damage to the Bluetooth circuitry. When operating the system, do not use any other AC adaptor.

Specifications

- Type: Class B
- DC in jack: DC 5 V, 700 mA
- Volume: 90 dB
- Frequency response: 40 Hz to 18,000 Hz
- Operating hours: 10 hours
- Battery: 3 x AAA alkaline batteries (not supplied)

Product dimensions

- Approximately 245 mm × 185 mm × 88 mm
- Weight: Approximately 1,060 g including batteries

Maximum communication range

Use Bluetooth devices within 1 to 2 (or a maximum of 4) Bluetooth devices can be connected in a single-hop configuration, and 8 Bluetooth devices can be connected in a multi-hop configuration. In both cases, performance may be reduced.

Note: The operating distance may be reduced when using multiple Bluetooth devices or in environments with obstacles.

Interference from other devices

Radio equipment, such as wireless LAN systems, cordless phones, and other Bluetooth devices, can affect the performance of the system, such as the Bluetooth headphone system. In such cases, perform the following.

- Change the channel of the Bluetooth device.
- Move the system away from the radio equipment.

Interference to other devices

Wireless equipment from other devices may affect the operation of electronic medical devices. Turn off the power of the system if you notice any unusual symptoms.

- System detection
- System status

- To store the system's operating status and memory, do not remove the power cord from the power outlet, even if the system is turned off.
- To ensure proper system operation, do not use the system near a television, camera, or other devices that use magnetic fields.
- Do not use the system near a television, camera, or other devices that use magnetic fields.

Notes on the AC adaptor

- When connecting or disconnecting the AC adaptor, turn off the power to avoid damage to the Bluetooth circuitry. When operating the system, do not use any other AC adaptor.

Turning the System on/off

1. Connect the supplied AC adapter.
2. Press the ON/OFF button.

Function of Parts

- ON/OFF button: Turn on/off the system.
- Bluetooth button: Pair with a Bluetooth device.
- buds button: Adjust the volume. A double press from the volume control on a smartphone.
- Press to pair with a Bluetooth device.

To use with LHS (size AA batteries) and batteries (not supplied)

- Place the LHS battery on the system, and turn the system on. Then, close the cover.

Notes

- The AC adaptor is not supplied with the LHS battery. Operate the system after connecting the LHS battery. Insert the battery properly after turning the system off.

Wireless Speaker System

- Specifications
- Speaker system: 50 mm
- Amplifier section: 2 x 100 mW + 2 x 100 mW (10 % T.H.D., 1 kHz, 6 Ω)
- Operational frequency range: 20 Hz to 20 kHz
- Maximum power: 4 W + 4 W
- Volume control: (± 10 dB)
- High-pass filter: 100 Hz
- Low-pass filter: 4 kHz
- Operating conditions: Indoors, 10°C to 35°C, 30% to 80% RH
- Dimensions: Approximately 245 mm × 185 mm × 88 mm
- Weight: Approximately 1,060 g including batteries

Operating Instructions

- Press to pair with a Bluetooth device.
- Touch to make Bluetooth connection with an NFC compatible device.
- Lights up when the system is turned on. Dims during battery Low Battery Indicator.
- Lights up or flashes depending on the communication status.

How to Make Wireless Connection with Bluetooth Devices

You can enjoy music and hands-free calling with the system by using your device's Bluetooth function. Follow the following procedures for connection.

- Connecting a Bluetooth device

1. To connect to a Bluetooth device that has been paired, see the manual.
2. One-touch connection with a smartphone (NFC): see “Pattern B Connecting with a mobile phone.”

Notes

- Some devices may not display a list of detected devices.
- Select “SRS-BTM” shown in the display of the Bluetooth device.
- If “Passcode” input is required on the display of the Bluetooth device, input “0000.”
- The system is paired with a maximum of 8 devices. If a new device is paired after 8 devices have been paired, the device whose latest connection was cancelled is deleted.
- To delete all pairing information from the system, refer to the operating instructions supplied with the device.

Pattern B Connecting with a Bluetooth device

1. Turn on the system.
2. Set the Bluetooth function of the Bluetooth device to on.
3. Search for Bluetooth devices and connect to the system. When the system is turned on first, the Bluetooth function is required to establish the connection.
4. Play music from your Bluetooth device.

Note

- Some devices may not display a list of detected devices.

Pattern A Connecting with a paired Bluetooth device

1. Turn on the system.
2. Set the Bluetooth function of the Bluetooth device to on.
3. Search for Bluetooth devices and connect to the system.
4. Play music from your Bluetooth device.

Notes

- When searching for Bluetooth devices, the system recognizes the Bluetooth device within 4 meters.
- When using the system to pair a Bluetooth device with NFC, replace the NFC sticker of the Bluetooth device with NFC (sold separately). For details, refer to the operating instructions supplied with the device.

Pattern C Connecting with a smartphone by One touch (NFC)

1. Download and install the app NFC Easy Connect on the smartphone.
2. Connect using the NFC function of your smartphone.

Note

- The Bluetooth connection is established with the Bluetooth indicator (blue) on the system.

Bluetooth technology is a registered trademark of Bluetooth SIG, Inc. Other marks are the property of their respective owners.

The NFC (Near Field Communication) standard is an international standard supported by various companies around the world and approved by various companies worldwide.

Communication System and Compatible Bluetooth Profiles of the system

Profile: standardisation of the function for each Bluetooth device. Specification: standardisation of requirements for each Bluetooth device.

Bluetooth® wireless technology

Bluetooth wireless technology is a specification that enables wireless communications between digital devices, such as computers and digital cameras. Bluetooth wireless technology operates on a frequency band of 2.4 GHz.

Connecting two devices is easy, but there are some devices that cannot be connected to both devices of the same type. For some devices, you can connect only one at a time, so you can connect only one at a time.

When connecting two devices, first connect the device to the same network, and then the device with wireless LAN technology, for example, you can use a device on a laptop or smartphone to connect to a wireless router, or you can connect to an internet-based service.

Wireless communication is an international standard supported by various companies around the world and approved by various companies worldwide.

About NFC

NFC (Near Field Communication) is a technology enabling short-range wireless communication between various devices, such as electronic devices and cards.

To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Note

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Open the NFC app and use it to perform the function.

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Note

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Open the NFC app and use it to perform the function.

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Note

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Open the NFC app and use it to perform the function.

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Note

- To use NFC, you must install an NFC compatible smartphone app or use NFC compatible cards.

Open the NFC app and use it to perform the function.
Listening to Music

This system supports Multipoint technology. You can enjoy hands-free calling with another device.

Using Hands-free Calling While Listening to Music

You can enjoy hands-free calling via Bluetooth connection with a Bluetooth mobile phone that has a music function and supports the Hands-free Profile and Audio/Video Remote Control Profile (AVRCP). When connecting cord (not supplied) is used with this system, the source device switches to the one connected by the cord automatically.

Listening to Music by Wired Connection with a Portable Audio Device, etc.

1. Connect the device to the system.

2. Turn on the system.

3. Start playback on the connected device, then adjust the volume.

Notes
- When using this system with a headphone or earphone, you may experience discomfort to your ears, depending on the volume level. If you feel discomfort, reduce the volume.

Tips
- When connected with a wireless device, the volume can be set on the connected device. If you reduce the volume, the system turns off automatically.

Troubleshooting

No sound / Sound from only one speaker / Low sound level

Check that both the system and the connected device are turned on.

If you are connecting a personal computer to the system, make sure the audio output setting of the computer is set for a Bluetooth device.

One-touch connection (NFC) is not possible

If the connected device is monaural, you will only be able to hear from the left speaker.

Pairing is not possible

If the BLUETOOTH indicator (blue) on the system is not flashing quickly, press and hold the BLUETOOTH PAIRING button until the system emits a single long beep.

No voice / Low voice from recipient

When connecting cord (not supplied) is used with this system, the source device switches to the one connected by the cord automatically.

One touch connection (NFC) can be used in the procedure.

Operations may vary depending on the connected device. This type of Bluetooth connection may not be established depending on the combination of the Bluetooth devices. Refer also to the operating instructions supplied with your Bluetooth device.

1. Make the Bluetooth connection between the system and the mobile phone.

2. Turn on the system. Press for about 2 seconds to change call device between the system and mobile phone.

Notes
- When connecting cord (not supplied) is used with this system, the source device switches to the one connected by the cord automatically.

Tips
- When connected with a wireless device, the volume can be set on the connected device. If you reduce the volume, the system turns off automatically.

Operations may vary depending on the Bluetooth mobile phone. Refer also to the operating instructions supplied with your mobile phone.

1. Make the Bluetooth connection between the system and the mobile phone.

2. Turn on the system. Press for about 2 seconds to reject call.

Notes
- When connecting cord (not supplied) is used with this system, the source device switches to the one connected by the cord automatically.

Tips
- When connected with a wireless device, the volume can be set on the connected device. If you reduce the volume, the system turns off automatically.

Operations may vary depending on the Bluetooth mobile phone. Refer also to the operating instructions supplied with your mobile phone.

1. Make the Bluetooth connection between the system and the mobile phone.

2. Turn on the system. Press for about 2 seconds to change the call device to the system.

Notes
- When the connection between the system and mobile phone.

Tips
- When connected with a wireless device, the volume can be set on the connected device. If you reduce the volume, the system turns off automatically.

Operations may vary depending on the Bluetooth mobile phone. Refer also to the operating instructions supplied with your mobile phone.

1. Make the Bluetooth connection between the system and the mobile phone.

2. Turn on the system. Press for about 2 seconds to cancel outgoing call.

Notes
- When connecting cord (not supplied) is used with this system, the source device switches to the one connected by the cord automatically.

Tips
- When connected with a wireless device, the volume can be set on the connected device. If you reduce the volume, the system turns off automatically.

Operations may vary depending on the Bluetooth mobile phone. Refer also to the operating instructions supplied with your mobile phone.

1. Make the Bluetooth connection between the system and the mobile phone.

2. Turn on the system. Press for about 2 seconds to pause.

Notes
- When connecting cord (not supplied) is used with this system, the source device switches to the one connected by the cord automatically.

Tips
- When connected with a wireless device, the volume can be set on the connected device. If you reduce the volume, the system turns off automatically.
