

## Using your Walkman while Swimming (Please read before using your Walkman)

To use your Walkman while swimming, note the following and fit your Walkman into your ears correctly:

- Choose the size of Swimming earbuds that feel quite snug.
- Fit your Walkman into your ears firmly.

### Notes while swimming

- Do not use your Walkman in places where an inability to hear surrounding sound would be dangerous.
- When you use your Walkman in public or private swimming facilities, follow the rules of that facility.
- Do not use your Walkman while swimming in a river or in the ocean.
- You cannot connect your Walkman with a smartphone.
- You cannot use the supplied Remote Commander.

## Preparations before swimming

### 1 Select the Swimming earbuds

The **standard-type** earbuds are attached when you purchase your Walkman. To use your Walkman for swimming, change the earbuds to **Swimming** earbuds.

#### Swimming earbuds

Swimming earbud has a hole covered with a thin film to make it difficult for water to get in.

thin film

#### Standard-type earbuds

The standard-type earbud has an open hole.

hole

### 2 Choose the best fitting Swimming earbuds

- There are 4 different sizes of Swimming earbuds (S/M/L/LL) supplied inside the box.
  - For swimming, choose a size slightly tighter than the standard-type.
- Your ears may require different sized earbuds as not all ears are the same. For example: left side medium size – right side large size.

### 3 Attach Swimming earbuds to your Walkman

- Install the earbuds onto the headphones so that the tip of the inner part of the earbuds (1) fits into the (2) position on the projection of the headphones.

- Make sure that the earbuds fit straight on, not at an angle, to prevent the earbuds from detaching and remaining in your ears.

### 4 Fit your Walkman into your ears firmly

Follow the procedures below and fit your Walkman into your ears firmly:

- 1 Place your Walkman so that the earbuds fit in your right and left ears snugly.
- 2 Turn the headphone part of your Walkman clockwise-counterclockwise to find the best position.

- Fit your Walkman into your ears before swimming while the earbuds and your ears are still dry.
  - Make sure to fit your Walkman into your ears firmly so that water does not get into your ears through a gap between your ears and the headphones.

## Improving the fit

### 1 Stabilizing your Walkman with the supplied adjustment band

You can place your Walkman more firmly into your ears by using the supplied adjustment band.

### 2 Stabilizing your Walkman with swimming goggles

By stabilizing the arrow-pointed part on your Walkman with the band of your swimming goggles, you can prevent your Walkman from detaching because of water pressure.

## If the sound becomes muffled during swimming

Water inside your ears or headphones may cause the sound to be muffled.

### 1 Removing the water from your ears

- Remove the water from your ears.

### 2 When the water gets inside the headphones

Remove the earbuds from the headphones and pat the headphones lightly about 5 to 10 times on a dry cloth.

## Taking your Walkman off

Gently move your Walkman up and down to take it off your ears.

#### Note

Removing the Walkman suddenly when the earbuds are fitted firmly in your ears may cause damage to your ears or eardrums, or the earbuds may remain in your ears.

## Maintenance

Clean the earbuds and your Walkman after every use as follows.

### Note

The build up of foreign substances such as earwax etc. in the headphone sections may cause deteriorated sound quality or sound loss. If there is a build up of any foreign substances on the terminals, your Walkman may not be charged or may not be recognized by your computer.

#### 1 Wash the earbuds.

- 1 Remove the earbuds.
- 2 Wash the earbuds by hand using a mild detergent solution.  
After washing the earbuds, dry them well.

#### 2 Wash your Walkman.

**Do not rub foreign substances on the mesh sheet. Doing so may push them into the headphones.**

- 1 Rinse the terminals and mesh sheet of your Walkman with gentle running tap water.
- 2 If the terminals and mesh sheet are not clean, wet a soft brush such as a toothbrush with water and clean them.

### Note

Do not apply strong force to the mesh sheet. Doing so may damage the mesh sheet.

- 3 Wipe the moisture off the terminals and surface of your Walkman using a soft dry cloth.

- 4 Pat the headphones softly against a dry cloth. Repeat patting about 20 times. Then place a dry cloth under the headphones and leave at room temperature for 2 to 3 hours.

### Liquids that the water resistant performance specifications apply to

**Applicable:** fresh water, tap water, perspiration, pool water

**Not applicable:** liquids other than those above (examples: soapy water, detergent water, water with bath agents, shampoo, hot spring water, salt water, etc.)

The water resistant performance of your Walkman is based on our measurements under the conditions described in this section. Note that malfunctions as a result of water immersion caused by misuse by the customer are not covered by the warranty.

### Notes on charging the battery

The USB cradle supplied with your Walkman is not water resistant. Before charging the battery, make sure your Walkman is not wet. If there is moisture on the Walkman, wipe it off completely, and leave the Walkman at room temperature to dry until no moisture remains on the Walkman before you start charging. Never use the USB cradle (supplied) with wet hands or when your Walkman is wet.

### Notes on using your Walkman

- The earbuds seal your ears. Therefore, there is a risk of damage to your ears or eardrums if strong pressure is applied to the earbuds, or the earbuds are removed suddenly from your ears. Due to this risk, do not do vigorous exercise, dive into a swimming pool, etc., while wearing your Walkman.
- Do not pour hot water directly on your Walkman and do not blow hot air from a hair dryer, etc., directly on the Walkman. Never use the Walkman in high temperature locations such as in saunas or near a stove.
- The sound volume is lower with Swimming earbuds than with standard-type earbuds. Increase the volume as needed.
- When you replace Swimming earbuds with the standard-type earbuds, the sound becomes louder. Adjust the volume so as not to hurt your eardrums.

### Water resistant performance of this Walkman

The water resistant specifications\*1 of this Walkman are equivalent to IEC 60529 "Degrees of protection against ingress of water (IP Code)" IPX5/8\*2, which specifies the degree of protection provided against the entry of water.

If you use your Walkman in a swimming pool, do not exceed a depth of 2 m (6.5 feet) while wearing it.

Before use, be sure to read and understand the water resistant specifications completely.

\*1 The headphone sections are not completely water-tight.

\*2 IPX5 (Degrees of protection against jets of water): Your Walkman, when Swimming earbuds are attached, will maintain its operability even when exposed to direct streams of water from any direction in a situation where approximately 12.5 l/min. of water is supplied for more than 3 minutes from a distance of about 3 m using a nozzle with an inner diameter of 6.3 mm. However, this does not apply to the headphone sections.  
IPX8 (Degrees of protection against continual water submersion): Your Walkman, when Swimming earbuds are attached, will maintain its operability even when submersed in water to a depth of 2 m for 30 minutes.

### How the sound may be muffled while you are swimming

- 1 If the water gets into a gap between your ears and the headphones (1) and covers the eardrum (2), sound may become muffled.  
→ You can prevent water penetration by using the most appropriate size of earbuds that fits your ears firmly.
- 2 If water accumulates in the drivers of the headphones (3), the sound may become muffled.  
→ You can prevent water penetration by using the Swimming earbuds supplied with your Walkman.
