The beat goes on with Sony's new Truly Wireless WF-XB700 and WH-CH710N noise cancelling headphones

Top row: WF-XB700
Bottom row: WH-CH710N

SYDNEY, 1 April 2020 – Sony today introduced two new wireless headphones, the WF-XB700 and WH-CH710N, providing the perfect hassle-free headphones for life on-the-go.

“We are proud to deliver Sony’s latest audio innovations, with headphone models that offer more ways to experience Sony’s EXTRA BASS™ and noise cancelling technology,” said Abel Makhraz, Deputy GM, Consumer Sales & Marketing, Sony ANZ.

Experience punchy sound with the WF-XB700’s EXTRA BASS™

Featuring Sony's EXTRA BASS™ technology, the XB700 Truly Wireless headphones create precise, punchy rhythms that lift every track and maintain vocal clarity for a superbly rich, well-rounded listening experience.

The XB700 Truly Wireless headphones are small and lightweight, making it easy to set your music free, without the bulk of other headphones. Sony's ergonomic Tri-hold structure also creates a comfortable and secure fit, ensuring they stay in place, even when exercising.

WF-XB700

Enjoy up to 9 hours of music per charge, with an additional full charge from the handy case¹, for up to 18 hours of music on-the-go. Additionally, just 10 minutes of quick charging provides 60 minutes of music playback. An IPX4 rating for water resistance means² protection against splashes and sweat so you can keep moving to the music while outdoors or working out.

Cancel out the world with WH-CH710N

¹ 1 time charging case is needed. 9H (earbuds) + 9H (charging case), total of 18H using Bluetooth.

² The case is not water resistant.

Hear more music and less background noise with the WH-CH710N noise cancelling headphones. While taking a long-haul flight or commuting to work, the Artificial Intelligence Noise Cancellation (AINC) constantly analyses environmental ambient sound components, and automatically selects the most effective noise cancelling mode for users' surroundings. Additionally, dual microphones feeding forwards and backwards mean the WH-CH710N headphones catch more ambient sounds than ever before.

WH-CH710N

Near Field Communication (NFC™) lets users start streaming their music with just one touch while a built-in Li-ion battery allows for up to 35 hours of audio on a single charge. Plus, with quick charging, customers get 60 minutes of playback from just 10 minutes of charging.

With an adjustable metal slider, users can make their headphones the perfect size, while soft, oval-shaped earpads mean they'll never need to take a break from their favourite music.

Availability & Pricing

Availability & pricing for both models is TBC.
