Sony releases A9 firmware update adding Real-Time Eye AF for animals, Interval Shooting functionality and compatibility with RMT-P1BT

SYDNEY, 24 September 2019 – Sony has released a new firmware update for its [a9](#) full-frame mirrorless camera (model ILCE-9), delivering key functions such as Real-Time Eye AF for animals¹, Interval Shooting and compatibility with [RMT-P1BT](#).²

The [version 6.00](#) update enables Sony's AI driven Real-Time Eye AF technology to now detect both animals and human subjects, with an option to select either animal or human Eye AF mode depending on the shooting situation. Time-lapse videos can also be created through use of the Interval Shooting function.

In addition to the new functionality, the update improves the overall stability of the camera and makes it more user-friendly, allowing photographers to assign 'My Menu' to appear when first selecting the menu button. It is now also possible to select the Focus Frame Colour allowing users to choose between red, grey or the standard green.

Lastly, the upgrade allows operation with the wireless remote commander **RMT-P1BT** providing a solution to remote shooting.

The Version 6.00 firmware upgrade is downloadable for free on the Sony Support site³.

###
